

FOR IMMEDIATE RELEASE

SQUAN Expands with Acquisition of ElecComm Electric & Communications Line Construction Company

Electric and Communications Line Construction Company to Complement SQUAN's Plans to Enhance and Scale its Geographic Reach to New England

Englewood, NJ – December 7, 2020 – [SQUAN](#), an industry leader specializing in telecommunications design/build services for network infrastructure, announced today that it has completed the acquisition of ElecComm (ECC), an electric and communications line construction company, based in Wilmington, Massachusetts, known for its commitment and emphasis on safety and quality control. The two companies have begun the process of integrating their operations and services to provide enhanced services for the electric utility and telecommunications infrastructure sectors throughout New England and New York.

ECC is one of the largest 24/7 underground and overhead high/low voltage electric and communication line construction companies in New England and provides round the clock overhead and underground emergency outage support. Being in business for nearly 20 years, the ECC team has laid and spliced thousands of miles of cable up to 35,000 volts. ECC is UWUA Local 369 company with its core focus on safety, health, and training.

“With the support, resources and operational expertise of the ECC team, SQUAN will further expand into untapped expanses providing high-performing services and execution efforts,” said Keith Pennachio, CSO and EVP of SQUAN. “As we remain focused on growth and creating long-term value, we are confident that ECC is a great strategic addition to the SQUAN family and we look forward to capitalizing on new opportunities and reaching even greater heights together.”

“The convergence of power and telecom infrastructure is inevitable. In joining SQUAN, we see a clear path for ECC to support the company’s position as a smart infrastructure services leader,” said Sean Martin, President of ElecComm. “My father, Steve Martin and I have built a solid foundation at ElecComm. The SQUAN acquisition takes our vision to a higher level, adding greater depth of resources across a broader base of clients”.

Bolstering SQUAN’s extension, ECC will aid the progress of its core infrastructure services business in New England. Together, both companies will work towards providing additional benefits for new and existing clients as they continue to strengthen their existing presence.

About SQUAN

SQUAN combines its unique and in-depth knowledge of network engineering and fiber construction to solve complex and evolving telecommunications problems around macro

networks, small-cell, DAS, 5G, IoT and smart cities for wireless, wireline and enterprise customers. SQUAN is focused on the evolution of communications networks of all types and how new technologies are changing the landscape of infrastructure. SQUAN provides design/build and advisory services for backhaul, small-cells, C-RAN, fiber, Right-of-Way, technical installs and maintenance.
