

Wireless Construction

Fast Mobilization. Clean Closeouts. Proven Wireless Execution.

Wireless Success Lives in the Details.

Wireless expansion continues as carriers, tower owners, WISPs, and in-building system operators densify networks, modernize assets, and meet rising data demand. Speed matters, but the real challenge is execution across tight schedules, complex sites, and multiple stakeholders.

Delays in access, coordination, and closeout can stall programs and slow revenue. Operators need partners who mobilize quickly, communicate clearly, and deliver consistent results without compromising safety or quality.

**SQUAN's focus is speed to market ...
without sacrificing execution quality.**

You get a wireless partner who anticipates site access and coordination challenges, adapts to your deployment process, and communicates clearly at every stage. Our approach is grounded in disciplined field execution and continuous improvement, ensuring each build, modification, and closeout performs better than the last.

With SQUAN, you're not outsourcing wireless construction. You're gaining a trusted partner who helps you move programs forward with clarity, confidence, and results that hold in the field.

Built for Accuracy. Ready to Respond.

SQUAN delivers turnkey wireless construction across macro, small cell, DAS, decommissioning, private networks, and site modernization, integrating seamlessly into customer workflows to ensure consistency across regions and project types. Differentiation comes from experience, with project management and operations leaders bringing decades of wireless expertise and practical field insight. Customers rely on SQUAN for accountable execution, competitive pricing, and dependable capacity when timelines matter most.

✓ Pre-Construction Alignment

Onsite pre-construction walks and site readiness reviews that identify risks early, reduce rework, and set clear expectations before construction begins.

✓ New Site Builds and Modifications

Turnkey delivery of new sites, relocations, and network modifications across macro wireless environments.

✓ Decommissioning

Program management and execution of large-scale decommissioning programs with disciplined safety and schedule control.

✓ Small Cell

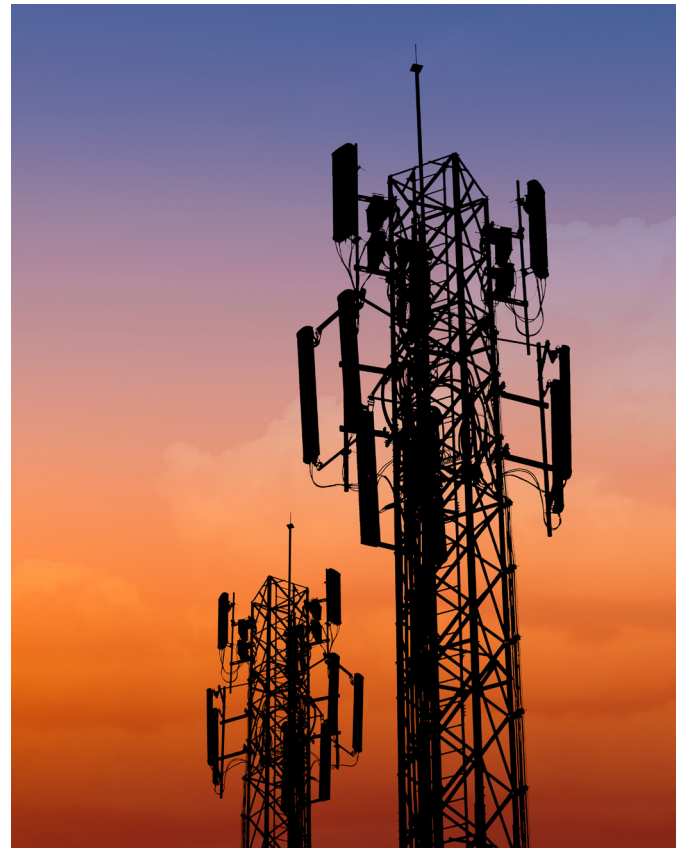

Deployment of small cell infrastructure delivered through proactive field safety practices and precise schedule coordination.

✓ In-Building Cellular and DAS

Turnkey design/build cellular and public safety in-building Distributed Antenna Systems, supported by more than 15 years of delivery experience.

✓ C-RAN and Backhaul Support

Construction and support services that enable network modernization and performance.

✓ Schedule and Program Management

Early schedule development, active coordination, and ongoing oversight throughout the project lifecycle.

✓ Landlord and Municipal Coordination

Direct coordination with landlords and municipalities, supported by clear and frequent communication of construction timelines.

✓ Site Audits and Closeouts

Detailed site audits, documentation, and timely closeout packages that keep projects advancing without delay.

Why Operators Choose SQUAN

We Remove Roadblocks EARLY

SQUAN coordinates directly with landlords, municipalities, and stakeholders to resolve access and readiness issues before they delay construction.

We Stop Rework Before It Starts

Early site walks and detailed planning identify conflicts upfront, reducing downtime and repeat work.

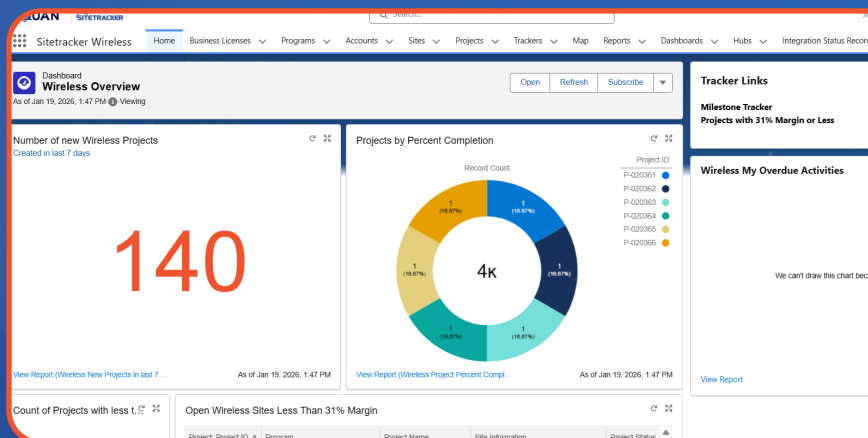

We Protect Your Reputation

Strong safety, quality control, and compliance programs keep work clean, consistent, and municipality-friendly.

We Scale AND Stay Connected

SQUAN combines national capacity with region-based leadership that stays engaged from kickoff through closeout.

Technology That Drives Transparency

Through SiteTracker and integrated reporting, customers see real-time schedules, site status, and closeout readiness without needing to visit the field. Clear visibility keeps programs moving and accelerates activation.

Proven Where It Counts

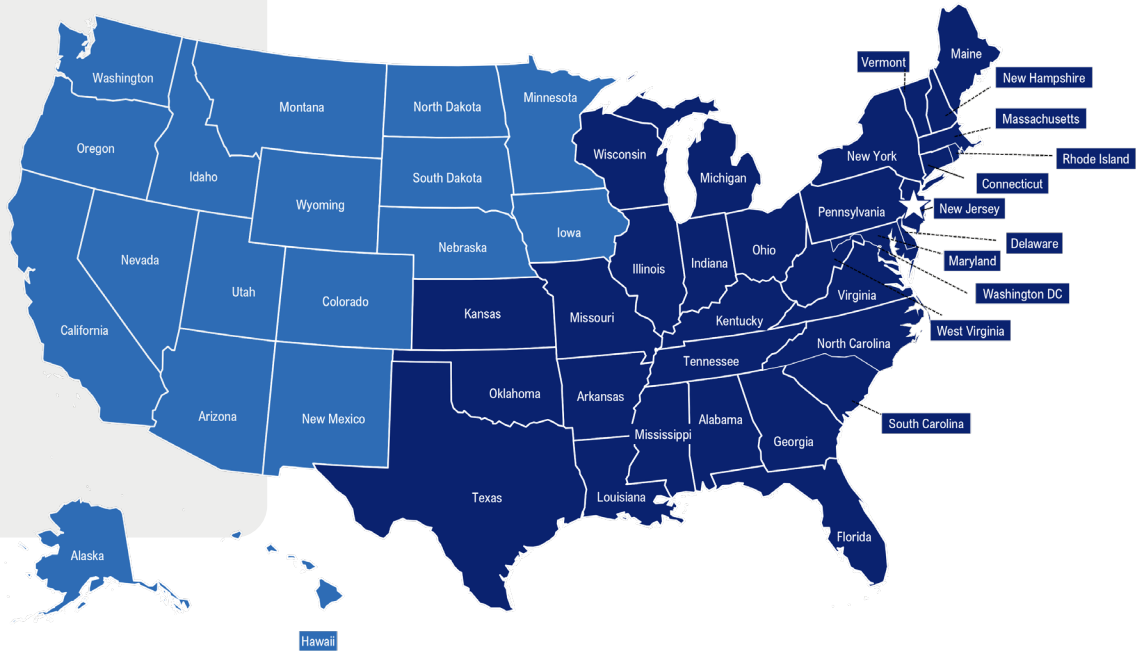

National Reach, Regional Strength

With active operations across the country and strategic mobilization capability in additional markets, SQUAN supports wireless programs where demand is highest and timelines are tight. The map reflects a footprint built for rapid response, consistent execution, and regional accountability.

Leadership You Can Reach, Experience You Can Trust

SQUAN leadership remains directly engaged throughout every wireless program. Customers have access to decision-makers who can resolve issues quickly and keep work moving when conditions change.

- ☆ Headquarters
- Operational States
- Available For Strategic Mobilization

Rapid Regional Mobilization

When a customer required immediate wireless support in New England, SQUAN deployed multiple crews within 10 days, stabilizing the program and earning expanded scope.

Consistent Delivery at Scale

Across multi-market deployments, SQUAN delivers repeatable performance that keeps schedules intact and projects advancing, supported by leadership and field teams who stay close to the work.

Experienced. Efficient. Quick to respond.

That is how SQUAN Wireless supports every project we build.

Your Smartest Move in the Wireless Market

Wireless construction demands partners who perform year after year. SQUAN has remained consistent by focusing on experienced leadership, clear communication, and disciplined execution.
